

Total functional programming in Agda

Alessandro Candolini

February 16, 2024

Agenda

1. Warm up

Warm up

- Proof assistant
- Dependently-typed functional programming language
- Total (i. e., termination and production checkers)

Agda timeline in a nutshell

- 1969** : Cornelis Vreeswijk releases the song *Hönan Agda*¹
- 1970s** : Martin-Löf intuitionistic type theory in mathematics
- 1999** : Catarina Coquand implemented in Haskell the original version of Agda
- 2007** : Ulf Norell develops Agda 2, with implementation described in his PhD thesis *Towards a practical programming language based on dependent type theory*
